1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 and 10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Schumann (2003/0059607).

Schumann discloses, in the example of paragraphs 142-143, a pressure sensitive adhesive comprising an asymmetric diisocyanate and a mixture of polyoxypropylene glycol having a molecular weight less than 100 and a polyoxypropylene triol having a molecular weight greater than 1000 and made at an NCO/OH ratio of 0.95/1 in the absence of water or solvent. The ratio of OH groups of the diol to those of the triol is 0.7. Paragraphs 112-113 show the same process for coating on a substrate.

3. Claim 9 is objected to for depending on a rejected claim.

4. Applicant's arguments filed 3-24-06 have been fully considered but they are not persuasive. The applicants argue that the Baycoll triol used in Schumann's example of paragraphs 142-143 has a molecular weight of 6000, thereby making the ratio of OH groups of the diol to the OH groups of the triol less than 0.7. Schumann show the molecular weight of the Baycoll as 6200, making the ratio of diol OH to triol OH equal to 0.7 (see Table 3, paragraph 338). The applicants argue that Schumann doesn't show

the same application. Claim 8 of the invention claims a wide variety of substrates, which Schumann reads on.

**5. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
